

Loading and Unloading Guide for Wavin AquaCell Stormwater Products

Loading Procedure

1. Preparation
 - a. Ensure the container is clean and free of any debris.
 - b. Confirm that all safety equipment (e.g., gloves, safety shoes, high-visibility vests) is available and used by personnel.
2. Equipment Required
 - a. Forklift truck
 - b. Pallet truck (manual or electric)
3. Loading Process
 - a. Use the forklift truck to move the pallets of Wavin AquaCell to the container.
 - b. Position the pallets near the container opening.
 - c. A person inside the container uses the pallet truck to move the pallets to the final position inside the container.
 - d. Stack the pallets securely, ensuring even weight distribution and stability to prevent shifting during transport.
4. Documentation
 - a. Take pictures of each loaded container for archival purposes.
 - b. If requested, take extra pictures during the loading process and share them with the customer before final order confirmation.

Unloading Procedure

1. Preparation
 - a. Ensure the unloading area is clean and organized.
 - b. Confirm the availability and use of safety equipment by all personnel involved in unloading.
2. Equipment Required
 - a. Forklift truck
 - b. Loading dock
3. Unloading Process
 - a. Position the container at the loading dock.

- b. Open the container doors and inspect the load for any visible damage or shifting that may have occurred during transport.
- c. Use the forklift truck to carefully unload the pallets from the container.
- d. Move the pallets to the designated storage area or staging area for further processing.

General Safety Tips

1. Always ensure that the forklift truck and pallet truck are in good working condition before use.
2. Adhere to weight limits and stacking guidelines to avoid accidents and damage to the products.
3. Use caution when handling the pallets to prevent injury and product damage.
4. Keep a clear line of communication between all personnel involved in the loading and unloading process.

Disclaimer

The loading and unloading procedures provided in this guide are based on general best practices and information supplied by the product shipper. It is important to adhere to all local safety regulations and guidelines, and to conduct a thorough risk assessment before proceeding. Wavin, North America and the product shipper are not responsible for any accidents or damages that occur during the loading or unloading process. Always use appropriate safety equipment and ensure all personnel are properly trained.
